Picture of Check list

The Ultimate Fly Fishing Gear List

Over 80 fly fishing check list items to check-off before you head out to the river.

Print this list and keep it by where you organize your gear before an outing.

Essential Gear

☐ Fishing license or permits. You should also check to see if the regulations have changed where you’re intending to fish. I know one of the rivers I fish has 6 different sets of rules as the river empties into Lake Huron. Luckily in the age of the interweb you can quickly look up changes.

☐ Rod, Reel and appropriate line for your targeted fish. If I’m exploring “mystery water” that I’ve never fished, I’ll grab my trusty 9’, 5 weight rod with floating weight forward line. I think of this fly rod as my Michigan 80% rod. It can handle 80% of anything I might find in my home state. A little light for steelhead and to stout for bluegills but most fish in between are fair game.

☐ Waders, belt, boots and a wading jacket. I carry a light weight packable wading jacket every time I go out. Fishing always seems to be better when the weather is a little bit nasty.

☐ Flies, this could be a long list, but I’m going to make a short statement. If you usually fish dry flies only, I’d recommend mixing in some old stand-by streamers and nymphs. It has saved the day for me a couple times.

☐ Leaders, A couple of each in sizes 2X to 7X. They are small and light so extras are easy to pack. Remember to check them over nicks and knots.

☐ Tippet, A 25 yd spools in sizes 2x through 7x. Some days it seems like you just eat tippet up. If chasing salmon add some 1x.

☐ Clippers and a nail knot tool. I use a combo tool with both on it, which I’ve forgotten before. If your smart you’ll have a couple of these, your dentist will appreciate it.

☐ A smile and good attitude – I’m mixing this in to see if your reading. Fishing and even reading about fishing is suppose to be fun. Enjoy

☐ Fly floatant, is essential for dry fly fishing. Apply it to your flies and let it dry before your outing and they will be ready to go straight out of your fly box.

☐ Stream Thermometer, understanding water temperature and changes in temperature can mean the difference between catching or not. 2 or 3 degrees can make the difference!
Line cleaner and dressing, your line will last longer, float higher and cast farther.

Split shot, beads, swivels and indicators. I’ve even started bringing a 4 foot section of T11 sinking line. That little section has allowed me to switch over to streamer fishing in a pinch.

I like using a combination fly fishing Vest/Pack. I’ve tried just a vest or bag in the past, but always come back to the combo. I can carry all the essential gear with ease.

Polarized Sun Glasses, vital to see fish and protects your eyes from flying hooks. If you wear glasses, Cocoons are a a great alternative.

Hat - protection from the sun and flying hooks. Look for a hat with a dark underside it helps cut down on glare.

A hook hone or a hook file. “Sharp Hooks Catch Fish” should be a slogan. A hone is cheap insurance, keep it handy and touch up your hooks often.

Sun Screen – To much sun can be dangerous, protect yourself. Wash your hands well after applying sun screen so you don’t contaminate your flies.

Insect Repellent – In Michigan, black flies and mosquitoes can drive you off the water. Carry a small bottle and apply to exposed skin.

Small first aid kit with tape and ointment, this is always a good idea. An ounce of prevention is better than a pound of cure.

Multi-tool aka Leatherman™ useful for reel repairs. Tightening screws, bending hooks, cutting…..you get the idea.

A safety pin or two, a quick fix for zippers, ripped clothes and cleaning hook eyes.

Ziplock Bags – To fish, you need to be by the water. Eventually you will fall in, a waterproof bag will keep your wallet, phone and camera dry.

Water and a snack, a little food and water will extend an outing. Stay hydrated and keep your strength up with an energy bar.

General Fishing

Net

Wading Staff – this is essential if you wade fast water or rivers with cobble bottoms.
Picture of wading staff

- Back up rod, reel and line
- Hatch chart
- Fly desiccant
- Assortment of float indicators

Picture of indicators
